

Black Friday. Cyber Monday.  
**TODAY IS THE DAY - #GIVINGTUESDAY™**  
November 28, 2017

**This is your chance to aid the children born in addiction and their families.**

***Why child care is important during drug and alcohol treatment:***

- Child care is provided on site so women can focus on their treatment while their children receive services to help foster healthy development
- Haymarket Center's family-centered programming treats the whole family
- Haymarket Center screens for developmental delays that are often brought on by mom's addiction. Providing appropriate interventions will address any delay that could prevent children from beginning school at the same level as other children their age.

***Today we are asking you to give what you can or maybe you want to start a monthly donation to share your love for these children....***

Your tax deductible gift can create a lasting change for the mothers in treatment, their children and families that are impacted by addiction. You can lessen the financial burden by choosing recurring payments in "**Donation Frequency**"

Please help on this **#Giving Tuesday**

**Give Now**

**Haymarket Center is a 501c3 non-profit** and your generous donation is tax deductible while also an opportunity to provide critical support to treat the 'whole person' from detoxification, treatment and into successful recovery.
